

EMIRHAN ÇANAKCI

Computer Programmer

ABOUT

I am a final year Computer Programming student, due to graduate in July 2023, with a keen interest in front-end development. Proficient in HTML5, CSS, and Javascript, I have also gained competency in Java, SQL, and Python through various courses, earning the respective certificates. Although I am 21 and lack formal job experience, my academic and personal projects showcase my programming skills and passion for the field. I am eager to bring my knowledge and enthusiasm into a professional setting.
